Automated Return Mail Processing

Powered by Expresso™

Seamlessly Manage Undeliverable Mail through Nordis Technologies' Advanced Integration with USPS ACS™

Premium return mail processing service that incorporates ACSTM or Address Correction Service from the USPS

Accelerate payments by identifying the corrected/ mailable address

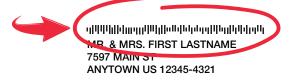

validation.

- Without ACS, Undeliverable as Addressed (UAA) mail is returned with NIXIE codes provided on labels physically attached to mail pieces and returned to sender.
- With ACS, each return item is identified by its Intelligent Mail® barcode (IMb) which is applied by Nordis at time of mail production.
- When possible, mail is forwarded to any new addresses identified by USPS.
- NIXIE codes and corrected address information are delivered electronically to the sender and undeliverable mail pieces are destroyed

Intelligent Mail® barcode

BENEFITS

- Delivers actionable data electronically
- Streamlines address updates
- Reduces manual processing (no more yellow stickers)
- Resolves engagement issues
- Accelerates payments by identifying the corrected/mailable address
- Eliminates the need for return mail PO Boxes
- Complements NCOA processing that occurs prior to mail production

COMMON UAA OR NIXIE CODE DESCRIPTIONS

- Not Deliverable as Addressed or Unable to Forward
- Temporarily Away
- Insufficient Address
- Refused
- Attempted Not Known
- Vacant
- No Mail Receptacle
- Box Closed No Order
- No Such Number
- Unclaimed

- Returned for Better Address
- Deceased
- Illegible
- Returned to Sender due to Addressee's Violation
- Outside Delivery Limits
- In Dispute
- Returned for Postage
- No Such Office in State
- Moved, Left No Address
- No Such Street

Automated Forwarding!

ACSTM

or Address Correction Service identifies new forwarding addresses then readdresses and forwards the pieces.
