

# ExpressoFinancial®

FOR CREDIT & COLLECTIONS

by Nordis Technologies

Managing and delivering collection letters and processing payments doesn't have to be time-consuming, complicated and costly. Our cloud-based ExpressoFinancial® software and services let you quickly and easily manage your communications and payments from a single dashboard, anywhere you are.

- With our simple-to-use yet powerful Expresso application, you can create, change, approve, produce, and distribute print and electronic statements, letters and other collections correspondence in just minutes.
- Add the secure ExpressoPay Payment Portal for online bill presentment and digital payments via your method of choice, including ACH, debit, or credit cards.
- Improve customer service with archive functionality, which gives you real-time access to historical customer documents in the cloud and allows agents to view letters when talking with customers.
- Simplify vendor management for your print and digital communications with Nordis Print & Mail services, including integrated real-time variable printing and data processing.

*"The Expresso platform "makes delivering the best product possible. It's become a very critical part of what we offer to clients."*

## Transform Your Business

### Accelerate revenue

Expresso means faster execution, plus options for secure digital communications while ExpressoPay offers an option for fully integrated electronic bill presentment and payments. Save on print and postage costs while eliminating the lag time in receiving mailed payments.

### Simplify compliance

Our powerful dynamic rules engine will automate disclosure presentment. When revisions are necessary, Expresso will identify and adjust all affected documents, plus create an audit trail of content changes for future reference.

### Reduce operational complexity

As the number of your customers, brands and letter versions grow, Expresso keeps the process simple yet customized, removing risk with superior version control and automated work flows.

### Speed client/program onboarding

Create branded, customized statements, letters and other communications for new clients and/or programs in just days instead of weeks or months.

### Enhance customer service and choice

Improve engagement and response by enabling omni-channel communications and payments, plus provide real-time online access to all customer correspondence.

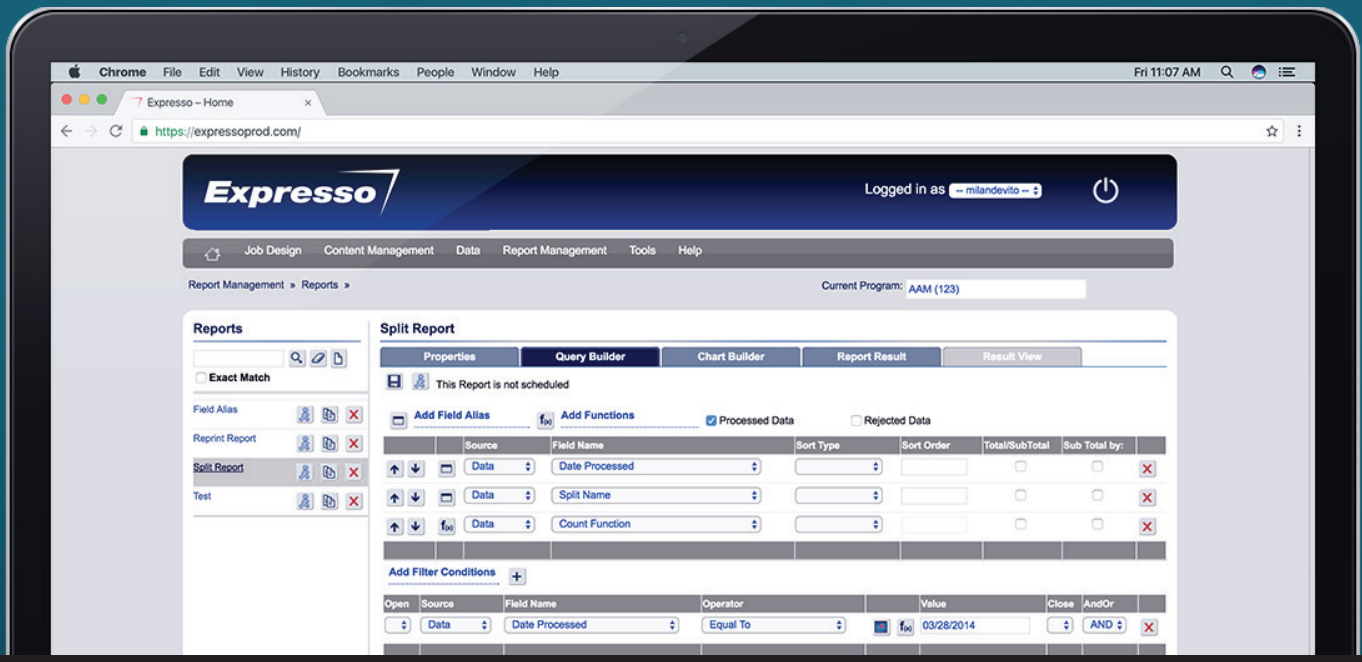

### Leverage secure, industry-leading technology

Our secure cloud-based software suite, with fully integrated production and mail services, lets you take advantage of the latest customer communications management features and capabilities without major investments of your own.
