

ExpressoHealth®

by Nordis Technologies

Managing and delivering patient communications and billing statements does not have to be time-consuming, complicated and costly. Our cloud-based ExpressoHealth software and services lets revenue cycle companies quickly and easily onboard new clients, adapt to changing business conditions, and offer the latest patient engagement technologies.

- With our simple-to-use yet powerful Expresso application, you can create, change, approve, produce, and distribute provider-specific print and electronic statements, confirmation notices and other patient correspondence in just minutes.
- Improve patient experience with the Expresso Archive function, which gives you and your customers real-time access to previously produced patient communications in the cloud.
- Simplify vendor management for your print and digital communications with our integrated Print & Mail services, including print on demand, variable, full-color digital printing and data processing.
- Go digital and deliver communications based on the customer's preferred channel, and leverage existing touch points to drive higher digital opt-in rates while reducing print and postage expense.

"Expresso gives us complete access for managing the templates, content and business rules that drive the onboarding and change management process for our hospital clients. By streamlining the workflow, we have more insight into our communication touchpoints, manage our operations more efficiently and can rapidly respond to the unique and changing requirements of our clients."

TEAMHealth.

Fazie Harney

Vice President of Applications
for Healthcare Financial Services

Improve performance and patient engagement

Speed provider onboarding

Use our platform to slash onboarding time for hospitals, physician groups, and other providers from months to days. Create branded, personalized communications in just minutes.

Accelerate revenue

Expresso means faster execution, plus options for secure digital communications. Save on print and postage costs while eliminating the lag time in receiving mailed payments.

Reduce operational complexity

As the number of your clients, brands and other variability grows, Expresso keeps the process simple yet customized, removing risk with superior version control, test output, automated workflows, and audit capabilities.

Gain control

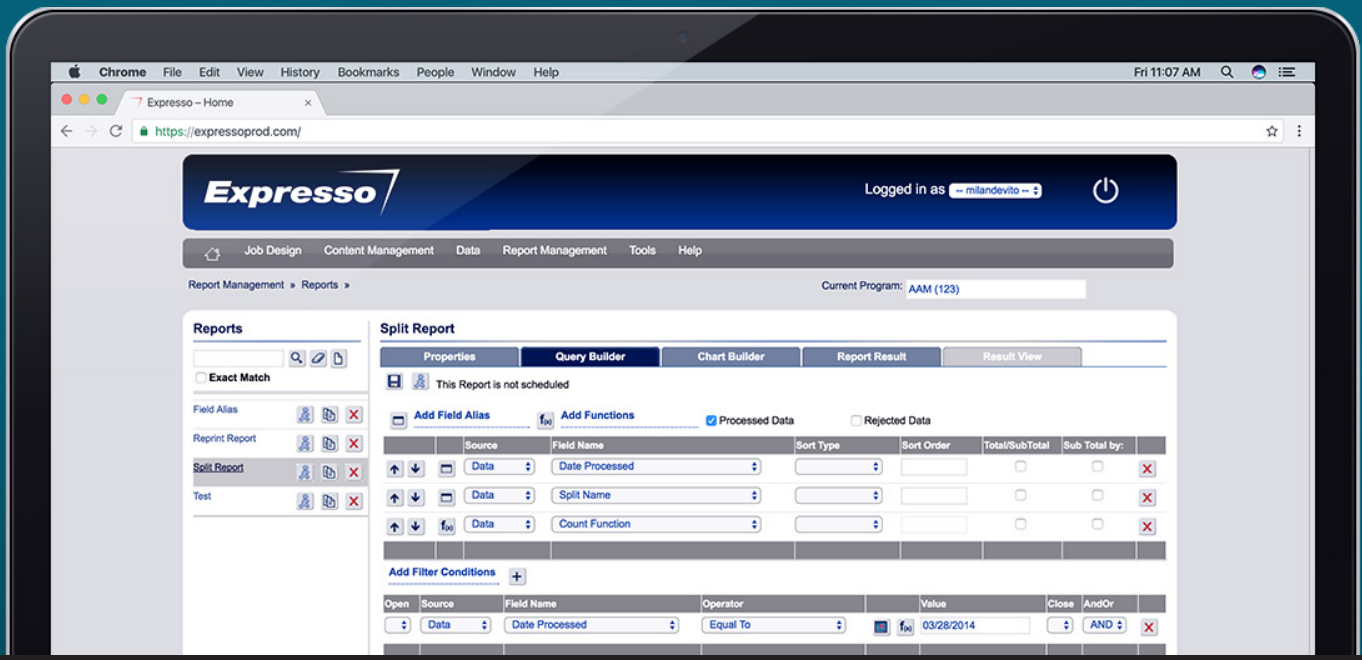

Run your entire communications process, creating, reviewing, approving, tracking and distributing documents and generating reports.

Drive patient experience

Meet rising consumer expectations for personalized communications, convenience and service by allowing patients to select their preferred methods for receiving communications. Lower costs and improve satisfaction with consolidated billing statements, combining charges from multiple service lines into one statement.

Strengthen security and compliance

Our software suite, processes and facilities are HIPAA-compliant and provide a secure business environment that includes PCI and SOC2 Type II certification.

Optimize and Automate

As a leader in solving complex communications challenges with pace-setting technology, we have developed a full-service solution for critical, recurring communications.

End-to End Solution

Critical communications management plus digital and print and mail production and distribution services, from a single dashboard

Cloud-based Platform

Scalable with 24/7/365 access
